

Our Mission:

Dolphin Dynamics aims to revolutionise the way travel agencies operate by delivering innovative, automated, information management solutions.

Our Background:

Founded in 1994, Dolphin Dynamics specialises in the development of cost-effective, leading edge, information management software for the travel industry. With headquarters in London, we have an additional sales and support office in Italy and distribution partners in Australasia, Spain and Israel. Dolphin Dynamics' products are used by over 800 travel companies with more than 11,000 users throughout Europe, the US and the rest of the world.

Our Products:

Dolphin Dynamics specialises in cost-effective, leading-edge software for the travel industry. Dolphin products, including TravelScanner, Travel Manager, FlightScanner and make up a powerful and flexible suite of management and booking systems.

Dolphin TravelScanner provides a single user-friendly interface to suppliers of flights, hotels, car hire and insurance. Coupled with a powerful rules-based pricing engine and directional selling capability, TravelScanner delivers a sophisticated dynamic packaging tool to power both web sites and sales agents' desktops.

Dolphin Travel Manager is the market-leading front, mid and back office automation tool for travel agencies that fully and seamlessly integrates in real-time with all four major worldwide Global Distribution Systems, Viewdata and Internet-based selling systems.

Dolphin FlightScanner is the most widely used professional booking engine for web fares, searching over 60 suppliers' web sites, plus the GDS and net fares, from a single screen.

Our Team:

Dolphin Dynamics has over 45 staff in the UK and 13 in Italy. Over half of our team have worked within travel agencies or the travel industry. Our products are developed by a team of 25 with extensive software development, testing and support experience.
