Overview

Dolphin Dynamics specialises in the development of cost-effective, leading-edge, information management software for the travel industry. The range of products covers point of sale, mid and back office functionality making up a powerful and flexible suite of management and booking systems. Dolphin Dynamics' products are used by over 800 travel companies with more than 11,000 users throughout Europe, the US and the rest of the world.

Market Sectors

Retail travel, business travel, call centres, tailor made specialists, online travel agencies, tour operators and consolidators.

Key Products

Dolphin TravelScanner

Dolphin TravelScanner provides a single user-friendly interface to suppliers of flights, hotels, car hire and insurance. Coupled with a powerful rules-based pricing engine and directional selling capability, TravelScanner delivers a sophisticated dynamic packaging tool to power both web sites and sales agents' desktops.

Dolphin Travel Manager

Dolphin Travel Manager is the market-leading front, mid and back office automation tool for travel agencies that fully and seamlessly integrates in real time with all four major worldwide Global Distribution Systems, Viewdata and Internet-based selling systems.

Dolphin FlightScanner

FlightScanner is the most widely used professional booking engine for web fares, directly linking in real time to over 60 supplier web sites from a single screen.
